Date of Commencement	05.06.2023
Date of Completion	29.07.2023
Duration of Course	60 Hours
Number of Students enrolled	66
Number of Students completed	66

Course Description

A 60-hour course integrating blockchain and cybersecurity principles to equip learners with skills in securing decentralized systems and protecting data from cyber threats.

Topics Covered

Course covering blockchain architecture, smart contracts, cryptographic principles, cybersecurity fundamentals, threat detection, and mitigation strategies.

Course Outcomes

- CO1: Understand the fundamentals of blockchain technology and its applications.
- CO2: Demonstrate the ability to develop and deploy smart contracts.
- CO3: Apply cryptographic techniques to secure blockchain transactions.
- CO4: Identify and mitigate cybersecurity threats in blockchain environments.
- CO5: Implement comprehensive cybersecurity strategies

About The College

Rajagiri College of Management and Applied Sciences is an affiliated college offering undergraduate and post-graduate degrees conferred by Mahatma Gandhi University. The courses are offered in the discipline of Management, Arts and Computer Application. Besides a robust teaching pedagogy, Rajagiri College of Management & Applied Sciences is also a leader in research and innovation.

The institution marks its inception in the year 2005 and is modelled on the dream and vision of Saint Kurikose Elias Chavara, the founder of CMA congregation and a social reformer in the 19th Century. Focus is given to activities beyond academics at Rajagiri College of Management & Applied Sciences, which is evident from its infrastructure, extracurricular activities and national & international collaborations.

About The Department

The Department of Computer Science at Rajagiri College of Management and Applied Sciences in Kakkanad, Kerala, is typically dedicated to providing high-quality education and training in various aspects of computer science, information technology, and related fields. The faculty members of the Department of Computer Science are typically experienced professionals and scholars who play a crucial role in delivering quality education, mentoring students, and guiding them through their academic and professional development.

Course Description

This course is designed to provide students with the essential skills and knowledge required to use Python for data science. Students will learn Python programming fundamentals, along with powerful tools and libraries for data manipulation, visualization, and analysis.

Topics Covered

Python Fundamentals for Data Science, Data Manipulation with NumPy and Pandas, Data Visualization with Matplotlib and Seaborn, Introduction to Data Science Principles, Data Science Projects and Applications

Course Outcomes

CO1: Master advanced Python programming concepts and techniques for data analysis.

CO2: Effectively use Python libraries such as NumPy, pandas, and SciPy for complex data manipulation and analysis.

CO3: Develop proficiency in data visualization using libraries like Matplotlib and Seaborn.

CO4: Implement machine learning algorithms using libraries such as scikit-learn for predictive data analysis.

CO5: Conduct comprehensive data analysis projects, from data cleaning and pre-processing to modeling and interpretation of results.

Course Description

This course offers a comprehensive introduction to the fundamental concepts of robotics and basic electronics, providing a solid foundation for students interested in the field of robotics. Students will explore the essential components of robots, including sensors, actuators, and microcontrollers, and gain hands-on experience in coding and microcontroller programming.

Topics Covered

Introduction to Robotics and Basic Electronics, Sensors, Actuators, and Microcontrollers, Coding and Microcontroller Programming Robot Building and Programming Techniques, Advanced Robotics Concepts and Applications

Course Outcomes

CO1: Understand the fundamental principles and components of robotics, including sensors, actuators, and control systems.

CO2: Develop skills in programming robotic systems using languages such as Python and C++.

CO3: Design and implement algorithms for robotic perception, navigation, and path planning.

CO4: Integrate hardware and software components to build functional robotic prototypes.

CO5: Analyze and solve complex problems in robotics through hands-on projects and real-world applications.

About the College

Rajagiri College of Management and Applied Sciences is an affiliated college offering undergraduate and post-graduate degrees conferred by Mahatma Gandhi University. The courses are offered in the discipline of Management, Arts and Computer Application. Besides a robust teaching pedagogy, Rajagiri College of Management & Applied Sciences is also a leader in research and innovation.

The institution marked its inception in the year 2005 and is modelled on the dream and vision of Saint Kutakosa Elias Chavara, the Founder of CMI congregation and a social reformer in the 19th Century. Focus is given to activities beyond academics at Rajagiri College of Management & Applied Sciences, which is evident from its infrastructure, extracurricular activities and national & international collaborations.

About the Department

The Department of Computer Science at Rajagiri College of Management and Applied Sciences in Kakkanad, Kerala, is typically dedicated to providing high-quality education and training in various aspects of computer science, information technology, and related fields.

The faculty members of the Department of Computer Science are typically experienced professionals and scholars who play a crucial role in delivering quality education, mentoring students, and guiding them through their academic and professional development.

Course Description:

This course offers a comprehensive introduction to the fundamental concepts of robotics and basic electronics, providing a solid foundation for students interested in the field of robotics. Students will explore the essential components of robots, including sensors, actuators, and microcontrollers, and gain hands-on experience in coding and microcontroller programming.

Topic covered:

- Module 1: Introduction to Robotics and Basic Electronics
- Module 2: Sensors and Actuators
- Module 3: Microcontrollers and Coding Fundamentals
- Module 4: Robot Building and Programming Techniques
- Module 5: Advanced Robotics Concepts and Applications

Course Outcome:

- CO1: Understand the fundamental principles and components of robotics, including sensors, actuators, and control systems.
- CO2: Develop skills in programming robotic systems using languages such as Python and C++.
- CO3: Design and implement algorithms for robotic perception, navigation, and path planning.
- CO4: Integrate hardware and software components to build functional robotic prototypes.
- CO5: Analyze and solve complex problems in robotics through hands-on projects and real-world applications.
